

4GET MIXING

THE RTU FORMULATION: ZENIVEX® E4.

Zenivex® E4 RTU mosquito adulticide is a ready-to-use formulation that requires no dilution, and no mixing. It's an easy-to-use and highly effective solution for controlling adult mosquito populations. This data sheet is a quick reference resource for the features and benefits of Zenivex® E4 RTU mosquito adulticide and its unique active ingredient, Etofenprox.

Zenivex® E4
RTU

ZENIVEX® E4 RTU - THE 4% SOLUTION

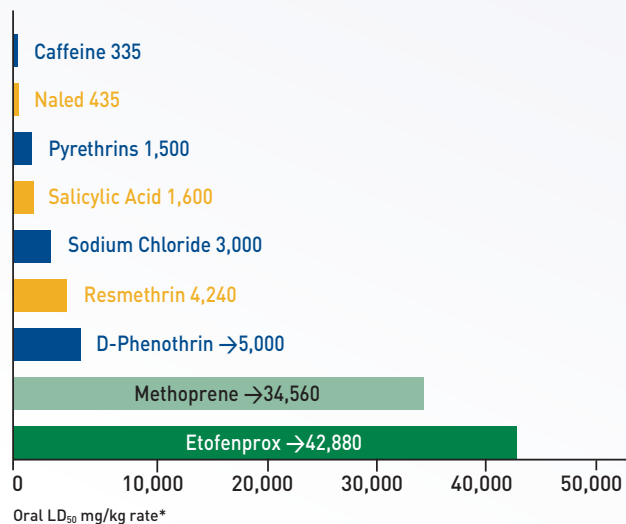

The Zenivex® E4 RTU formulation contains 4% of the active ingredient Etofenprox. This means Zenivex® E4 is ready-to-use (RTU) for ultra low volume (ULV) applications without dilution and without mixing.

4GET PBOs

The Zenivex® E4 RTU mosquito adulticide formulation contains no synergist, that means no PBOs. The active ingredient, Etofenprox, is classified as reduced risk by the EPA. While it is hard on adult mosquitoes, Zenivex® E4 adulticide is easy on the environment. Etofenprox is a non-organophosphate, non-carbamate, non-ester pyrethroid. It has a very low toxicity profile and its dried residues are easy on bee populations.

COMPARATIVE ACUTE TOXICITIES

An LD50 is a measure of toxicity. The longer the LD50 bar, the lower the toxicity. Compared to other leading mosquito control products, **Etofenprox is the least toxic.**

ZENIVEX® E4 RTU FEATURES:

- High efficacy
- Reduced risk
- Quick knockdown
- No known resistance
- No aquatic setbacks
- Ready-to-use formulation
- Economical usage rates
- Low odor formulation
- Flexible application rates
