

A Fresh Way to Look at **SPRING CONTROL**

FEATURES & BENEFITS

- 1 When applied at low label rates, Altosid® SBG II provides one of the **lowest costs** per acre for a single brood granule treatment
- 2 The **heavy bulk density** of Altosid® SBG II allows:
 - More acres to be treated per load
 - Superior vegetation penetration
 - Better swath widths
- 3 (S)-Methoprene, the active ingredient in Altosid® SBG II, provides excellent **control in cold water** via contact or ingestion
- 4 Can be used in **pre-hatch applications**
- 5 Up to 7 days of residual control
- 6 Effective on all mosquito instars including 4th instar larvae - providing a **wider window of control**
- 7 All Altosid® SBG II purchases also **earn cash back** rebates under the Central Life Sciences' All Clear rebate program, making all treatments even more economical
