

MOSQUITO CONTROL EVOLVED BY INNOVATION

Zenivex® mosquito adulticides are ready-to-use for both ground and aerial applications, feature EPA reduced-risk classification, require no aquatic setbacks, contain no PBO, and may be applied over crops, making them ideal control solutions in both urban and rural areas. Zenivex® E20 serves as an oil-dilutable option for Ultra Low Volume (ULV) applications. Zenivex® E4 can be used undiluted in ULV applications, while Aqua Zenivex™ E20 delivers the trusted Zenivex® performance and safety profile in a water-dilutable formulation.

Zenivex® E20 Mosquito Adulticide

Achieve quick and permanent mosquito knockdown with the flexibility for diluted or undiluted applications. Zenivex® E20 mosquito adulticide carries an EPA reduced-risk classification without the use of PBO or synergists, and it is approved for use over crops, pasture and rangeland.

Zenivex® E4 RTU

No dilution, no mixing. This easy-to-use adulticide formulation delivers effective control of adult mosquito populations with a reduced-risk classification and no PBO. The active ingredient, Etofenprox, is hard on mosquitoes but easy on the environment.

Aqua Zenivex™ E20

Experience the same efficacy and outstanding toxicity profile expected from a Zenivex® product in a water-dilutable formulation that won't clog filters or spray nozzles. Apply in or near residential, industrial and commercial properties; over agricultural crops, pastures and rangeland; and other areas where adult mosquitoes, non-biting midge flies and nuisance flies are a problem.
